International Consumer Services Sweden AB (alaTest/ Valuechecker)
Stockholm, Sweden

Respected ma'am:

I am interested in Full Stack developer at alaTest/ Valuechecker, as per the requirement for a project on AIESEC website.

I study Computer Engineering at Shivajirao S. Jondhale College of Engineering, Dombivli (Affiliated to University of Mumbai). I believe that my skills and experiences gained during my academic career as well as the internship projects during gap years, makes me an ideal candidate for the job.

This profile requires meticulous analytical/research skills and being well prepared for planning, organizing and prioritizing work efficiently. And working at different places, not only enhanced my interpersonal communication and decision making but also my Problem-solving skills.

Earlier, I created apps and games in free time as a hobby. So, trying new technologies was my thing from the beginning. I have aced the Microsoft Technology Associate Exam (MTA) for ASP.NET and C# fundamentals along with successful completion of project on Visual Studio platform. Besides this, I am an EC-Council Certified Security Analyst (ECSA). During my academic career I had the opportunity to work on quiet a list of technologies such as C, C++, Java, PHP, HTML, WordPress, JavaScript, AJAX and a few others for the projects. So, it won't be an issue for me to get set on new technologies either.

I was selected for a one-and-a-half-month AIESEC GV Internship for a project at Bolzano, Italy. There I created a few websites for the organization. Recently I finished my AIESEC GE Project at Corfu, Greece as a Software Engineer. So, I decided to apply for this opportunity where I can work and put myself into betterment of the Industry and learn new things, along with experiencing and exploring new places and cultures. I really look forward to work at Sweden because working there for a project would be the best way to learn new technologies and to explore Sweden.

I am confident that my experiences and skills qualify me for consideration. If you would like, I can provide you with my work. I have also enclosed my resume. I look forward to meeting with you and discussing my qualifications in more detail.

Sincerely,

Harshad Shirsat
